ENFLOW

Enflow is a Canadian based designer and manufacturer of high quality valves and has established a reputation as a reliable provider of technologically advanced high quality, engineered valve products for the global market. The Enflow management team has over 200 years of proven valve experience.

Valves are our core business. We are committed to Total Customer Satisfaction by meeting or exceeding our customers and industry expectations for quality and service from design to delivery. We strive to provide a value added benefit to our customer base through design, longevity of service and technical assistance.

Enflow produces a broad range of quality valves for Oil and gas production, pipelines, utilities, shale gas and oil, processing, petrochemical, SAG-D, steam, power, waste water and mining.

Applications range from light industrial to critical areas such as cryogenic, subsea pipelines, offshore platforms, LNG, and acid gas.

ENFLOW COMPANIES

Enflow Industries Inc.	Calgary, Alberta, Canada
EF Manufacturing Inc.	Calgary, Alberta, Canada
Flow Control Oil and Gas Products division EF Manufacturing Inc.	Calgary, Alberta, Canada
Enflow Industries Equipment (Suzhou) Co. Ltd.	Suzhou, China
Enflow Hong Kong Limited	Hong Kong
Enflow FZE	Dubai, UAE

MANUFACTURING STANDARDS AND QUALIFICATIONS

Enflow maintains a rigid Global Quality Management System in full accordance to ISO 9001, ISO TS 29001 (API Q1), and ABSA (Alberta / Canada Government pressure equipment safety authority) which is audited by recognized third party authorities, annually.

Our products have been third party tested to various standards including fire safe Testing: API 607 /ISO 10497, Fugitive Emission Testing: ISO 15848-1 qualification testing and ISO 15848-2 production testing, IEC 61508-2 SIL safety integrity level and Cryogenic Testing: BS 6364, Our improvement to quality product verification is continuous. We have additional third party laboratory and certification programs in process. Our goal is to ensure our designs provide the optimum value for performance, safety and longevity of life.

ORGANIZATION	STANDARD	DESCRIPTION
American Petroleum Institute	API 598	Valve inspection and test
	API 6D	Specification for pipeline valves
	API 607	Fire test soft seated quarter turn valves
	API 608	Metal ball valves flanged and BW ends
	API Q1	Quality programs for petroleum & gas
American Society of Mechanical Engineers	B16.1.20.1	Pipe Threads
	B16.5	Pipe flanges and flanged fittings
	B16.10	Face to face end to end valve dimensions
	B16.25	Butt welding ends
	B16.34	Valves, flanged, threaded & welding end
	B16.47	Larger diameter steel flanges 26" to 60"
British Standards Institute	BS 6364	Valves for cryogenic service
	BS 10204	Inspection documents, metallic materials
	BS 17292	Metal ball valves - petroleum, allied industries
Canadian Standards Association	CSA B51	Boiler, Pressure Vessel & Piping
	CSA Z245.15	Steel valves for oil & gas pipeline systems
European Standardization Organizations	EN10204	Inspection Documentation for Metal parts
	EN12266-1	Seat Leakage Rates in On/Off valves
International Electromechanical Commission	IEC 61508-2	Safety of electronic systems (SIL safety integrity level)
International Organization for Standardization	ISO 5208	Pressure testing of metallic valves
	ISO 5211	Valves- part turn actuator attachment
	ISO9001	Quality management systems
	ISO 10497	Testing of valves- fire type
	ISO 14313	Pipeline valves- Petroleum & Natural Gas Ind.
	ISO 15848-1	Fugitive emission qualification approval testing
	ISO 15848-2	Fugitive emission production testing
	ISO 21011	Valves for cryogenic service
Manufacturers Standardization Society	MSS SP-25	Standard marking systems for valves
	MSS SP-44	Steel pipeline flanges
	MSS-SP-53	Quality standard valve steel castings & forgings
	MSS SP-54	Quality- valve casting & forging - radiographic
	MSS SP-55	Quality standard steel valve castings - visual
	MSS SP-72	Valves- flanged or Butt welding ends
National Association of Corrosive Engineers	NACE MR 0175	Materials for use in H2S environments
	NACE MR 0103	Materials resistant to Sulphide stress cracking in corrosive refining

ENFLOW FLOATING BALL VALVE FEATURES AND BENEFITS

DESIGN

- **DESIGN AND DIMENSIONS:** to API 6D, ISO 14313, CSA Z245.15, API 608.
- **UNIBOLT GLAND:** ensures even packing load and prevents cocking.
- **SPRING LOADING OF PACKING:** maintains constant load on packing eliminating the need for constant adjustment.
- **INDEPENDENT MULTI STAGE PACKING:** ensures compliance to the severe low emission standards and eliminates the requirement for stem sealant injection.
- **PRIME SEALS ARE INERT:** for the widest range of service applications. Secondary stem and seat seal options allows the choice of inert or customer preferred materials.
- **UNIQUE HIGH VOLUME SEAT RINGS:** provide absolute seal in low and high pressure conditions. Seat rings are designed and tested to API 6D / ISO 14313 / CSA Z245.15, with the API 6D pressure testing sequencing of high pressure seat test first and low pressure seat test last, exceeding the easier requirements of API 598.
- **INDEPENDENT DUAL BODY JOINT SEALS:** combined with a tight tolerance metal to metal overlap, joint seal integrity and strength is ensured. Both seals are different inert materials (PTFE and Graphite) and both are enveloped on all sides by specially designed metal joint pocket construction.
- **LOCKING FEATURE:** is standard on all valves.
- **ANTISTATIC:** valve has dual antistatic stem, grounding stem to body and stem to ball.
- **WALL THICKNESS:** wall thickness of all valves **exceed** the ANSI B16.34 requirement, to ensure thickness between heavy and light sections have the proper volumes for optimal flow and cooling, eliminating shrinkage which is a major cause of shell leakage. The additional wall thickness also meets the customer requirements for additional corrosion allowance.
- **ANTI BLOW OUT STEM:** retains the stem safely.
- **AUTOMATIC INTERNAL CAVITY RELIEF:** automatic provides relief of dangerous pressure build up in the cavity with venting safely contained within the line.
- **FIRE SAFE:** 3rd party tested and certified to API 607.
- **ISO 5211 MOUNTING PADS**
- **NACE MR0175**
